

Transform Your Business with Next-Gen Collaboration, Security, Networking and Data Center Solutions

Today's organizations face increasing pressure to enable the workplace of tomorrow—a connected environment that seamlessly and securely leverages world-class collaboration, security, networking and data center solutions. Whether you're looking to utilize a next-gen meeting tool or build a sounder security posture, Carousel helps clients drive favorable business outcomes by easily implementing or integrating Cisco technologies.

CUSTOMER BUSINESS CHALLENGES

- Looking to integrate disparate communications and collaboration tools (e.g. voice and video, conferencing solutions, messaging apps) that are often provided from different manufacturers
- Need to simplify your complex security environment by reducing the number of vendors and implement a platform that can do more than just point-solutions
- Desire to more effectively manage your core collaboration, security, networking and data center environments
- Inability to support the modern workplace due to limitations in existing networking and security technologies
- Spending too much time in the day-to-day instead of focusing on how to strategically support business goals

THE CAROUSEL OFFERING

As a Cisco Gold Partner—boasting more than 240 certifications—Carousel helps clients implement and integrate leading Cisco technologies and solutions across collaboration, networking, data center and security. Representing the full array of differentiated Cisco solutions and services, Carousel is uniquely positioned to not only help businesses identify and deploy Cisco solutions, but also support those solutions through our Carousel Managed Services offering.

Carousel specializes in interoperating existing technologies with Cisco solutions, ensuring that we leverage the most effective technology to support your unique business needs, rather than forcing your business to fit the technology.

KEY BENEFITS

- Leverage Cisco technologies to support the modern workplace, enabling anytime, anywhere communication and collaboration organization-wide
- Bolster your security posture by gaining visibility and contextual awareness into the health, functionality and performance of your critical network infrastructure
- Automate core network tasks by utilizing industry-leading Cisco data center and networking technologies
- Drive business transformation with Cisco technologies by allowing Carousel to support “run” tasks, while you focus on “growth” initiatives
- Ensure that all of your technologies interoperate seamlessly, avoid inefficiencies caused by managing siloed, disparate systems
- Integrate Cisco technologies through a Carousel-led, phased implementation and migration
