

# Security Jumpstart

The security landscape changes at such a rapid pace, it's nearly impossible for security, IT, or business leaders to stay on top, let alone ahead, of the latest threats and how they can best protect their sensitive data.

Carousel's Security Jumpstart, a one-day on-site collaboration between your organization and a Carousel expert, is a perfect step to building or expanding an effective cyber security program. With decades of security strategy experience and full stack IT capabilities, Carousel will deliver the clarity and confidence you need to implement or enhance your enterprise security program.

## YOUR CHALLENGES

- Blind spots: limitations of current technology in detecting, preventing, and recovering from a breach
- Visibility: inability to protect what you cannot see; understanding asset inventory
- Context: understanding how current applications and datasets are being leveraged by the user community
- Confusion: understanding the appropriate solutions to mitigate present and future threats
- Noise: sifting through the high volume of vendor offerings and identifying their differentiators
- Talent: combatting talent shortage in IT industry and knowing how to do more with less

## GOALS AND BENEFITS

During working sessions, Carousel experts help you craft a strategy and roadmap for strengthening your security program, taking the following assessment and planning steps:

- Understand the business's current state of security and its network foundation
- Identify the desired future state of your enterprise security strategy
- Provide advisory services and education around various security technologies, features, benefits, and discuss adoption and governance strategies

## APPROACH AND ACTIVITIES

A one-day workshop is tailored to fit your needs—complete with discovery, education, and training. In the end, we'll provide a strategy for improving your overall security posture, including a:

- Presentation outlining current state, analysis, and recommendations for the future
- Delivery meeting to review and discuss all findings and recommendations with the team

## COMPLIMENTARY OFFERINGS

**Managed Services**

**Threat Visibility Jumpstart**

**Ransomware Defense Jumpstart**
