

Unified Communications & Collaboration JumpStart

Are you unsure of the best UC&C solution for your business needs?
Our UC&C JumpStart explore the benefits and requirements of modern UC solutions.

As a leader in IT, your organization's productivity and perhaps its success may be riding on the positive deployment of a collaboration project. But, you may be stuck determining how to get started or, if you already have an implementation in-process, your concern could be user adoption. No matter your challenges, Carousel will deliver the clarity and confidence you need thanks to decades of multi-vendor integration experience and full stack IT capabilities.

YOUR CHALLENGES

- Understanding how to use collaboration tools to benefit the business
- Discovering the appropriate platform to deploy or migrate to
- Confusion about multi-vendor integrations and concerns about potential business disruption
- Desire to work with one vendor throughout the process

PROGRAM BENEFITS

- Two-day advisory workshop with a subject matter expert will bring clarity to determine the solution you need and how to get there, no matter where you sit in the decision-making process
- Through business value mapping, we'll define UC impact zones and define the solution whether a vendor has been selected or not
- With full-stack capabilities, you can rest assured knowing you have a single partner that can deliver world class, integrated solutions, as well as financing options
- We'll deliver a comprehensive benefits and solution recommendation presentation so you're confident in the direction you choose

Unified Communications & Collaboration Envisioning

Do you know the solution you want, but unsure of the best approach to architect and roll out UC? Our UC&C Envisioning will show you how to best maximize your solution.

As a leader in IT working feverishly to adopt or strengthen your modern UC platform and strategy, it can be challenging to know the exact steps to get to the desired state. You may have a clear scope defined, but want to look to an outside provider to assist with build-out or vendor analysis. Or, you know the scope and vendor, but struggle with identifying the non-UC related components like security, networking or the cloud. With decades of UC strategy experience and full stack IT capabilities, Carousel will deliver the clarity and confidence you need to execute a successful UC project.

YOUR CHALLENGES

- Despite knowing the scope or solution you want, hesitation about how your needs map to a specific vendor
- Confusion defining the UC vision, impact zones and strategy
- Uncertainty about multi-vendor integrations and concerns about potential business disruption
- Desire to work with one vendor throughout the process—from strategy to deployment and management

PROGRAM BENEFITS

- A one- to six-week program is tailored to fit your needs—complete with discovery, education and training
- Our vendor-agnostic approach will deliver solutions mapped to your specific requirements
- Full IT stack capabilities mean one vendor to deliver and support the entire project—from backend networking through user adoption strategy and financial support
- A presentation comprised of a complete UC strategy—from requirements to solution approach and day two planning—is completed to bring confidence and visibility to your initiative
