

Inventory Management

The larger your business is, the more difficult it becomes to manage your IT and physical assets. Carousel's Inventory Management Service helps you monitor and maintain tangible and intangible assets, providing the greatest ROI and minimizing future expenses. Our patented process for inventory logistics, tracking, and reporting provides you with total command of your valuable assets, while our certified repair and refurbishment center extends the life of your existing hardware.

WE KNOW

- 21% of companies use a spreadsheet program to manage their inventory
- 15% of companies use an accounting program to manage their inventory
- 14% of companies use a manual process to manage their inventory
- 8% of companies use nothing at all to manage their inventory

WE UNDERSTAND

- Now, more than ever, companies need a strategy around equipment lifecycles
- Companies need to reduce cost through purchase of refurbished products with a like-new quality
- Companies need to reduce the cost of IT spend while maintaining high levels of quality and support

YOUR CHALLENGES

- Complex process for keeping track of your equipment and source specialty packaging, resulting in the potential loss of inventory
- Limited time, bandwidth, and resources to deal with major carriers and navigate international customs
- Confusion around when and which items to resell, refurbish, or scrap to optimize your capital investment
- Lack of spares management process around the care of existing hardware within your network
- High total cost of ownership with existing hardware due to limited warranties and support
- Inability to stage and test hardware prior to site deployment

THE CAROUSEL OFFERING

When enabling your business and supporting clients, it can be easy to compute managed services with your technology roadmap, while neglecting managed services for your physical assets. Carousel's Inventory Management Service helps you monitor and maintain tangible and intangible assets, through our full-service, 125,000 square foot ISO 9001:2015 compliant Plano, Texas, distribution facility.

We offer the following services: inventory and storage; repair, refurbish and equipment optimization; barcoding; custom packaging and reporting; and global shipping and logistics. By having total command of your assets, you can enjoy the security of a zero percent shrinkage guarantee.

KEY BENEFITS

- Track warranty and repair history, while also being able to tie multiple custom fields to a single serialized barcode
- Tailor programs to meet your needs, and a variety of packaging options
- Effectively and efficiently ship your items around the world—on-time and on-budget—leveraging Carousel's strong relationships with all major carriers, including FedEx, UPS, DHL, and USPS.
- Through Asset Discovery, determine what to resell, refurbish, or scrap by evaluating your existing equipment and surplus inventory
- Extend the quality and life of your hardware while reducing the total cost of ownership
- Help optimize your capital investment
- Barcoding throughout the life of your products
- Minimize your overhead support
- Personalized access to reports
